Jonite reserves the right to change the designs or specifications without notice

- NOTE:
1. The part numbers stipulated here may not necessarily run in order.
 2. The surface texture of the poolgrate is one grade smoother than gratings.
 3. It is advisable to select lighter colours for pool grates due to white powdery deposits from chlorine in the pool unless non-chlorinated water is used.
 4. *Blank-Ends are specially designed with 50mm more blank spacing on both sides of the grate for trimming during installation which will create a much neater appearance.
